

# ▶ Cost – Benefit in Adapting to Climate Change

- ▶ CIRCLE Clustering Workshop
- ▶ Bonn, 24 September 2009

24th September 2009

Annette Münzenberg & Stephanie Janssen  
PT-DLR

1/11

## Stephanie Janssen

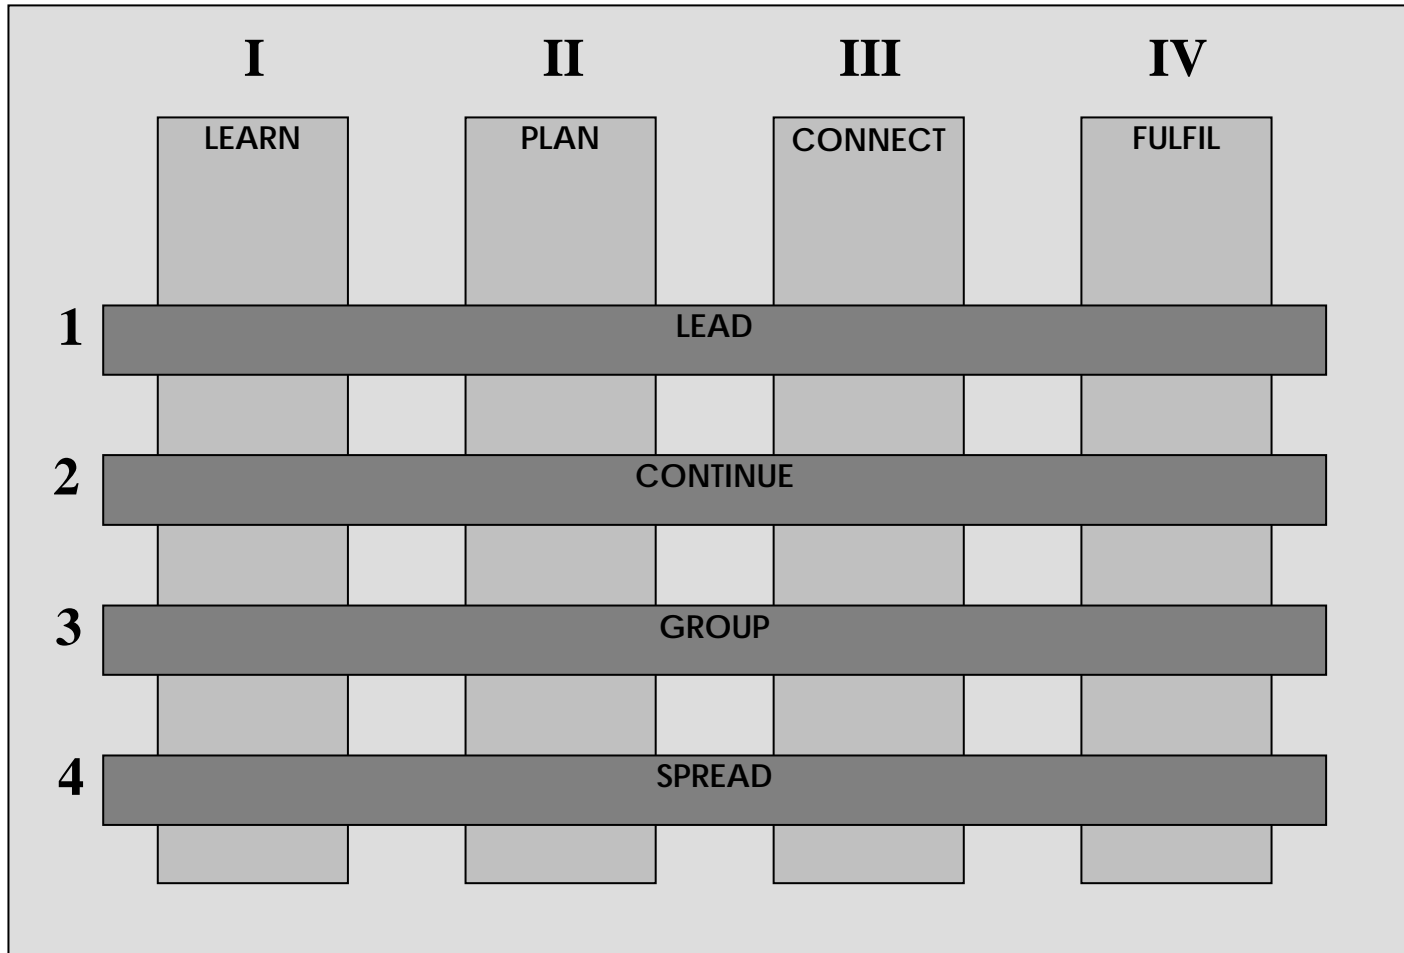

- at PT-DLR since 2008 as administrating scientist
- working for klimazwei, KLIMZUG, general adaptation
- In CIRCLE since 2008

## Annette Münzenberg

- at PT-DLR since 2000 as administrating scientist
- responsible for klimazwei, KLIMZUG, general adaptation, climate knowledge (e.g. DEKLIM in former times, MiKliP, ...), climate knowledge transfer
- In CIRCLE since 2004

# EU-ERA-Nets and CIRCLE

- What is an ERA-Net?
- What is CIRCLE?
- What is the role of PT-DLR in CIRCLE?

- **2005 - 2009**
- **Partners from 19 countries**
- **13 additional countries with observer status**
- **Topic: Climate Impact & Adaptation**
- **NO mitigation**
- **CIRCLE-1 ends this month!**
- **CIRCLE-2 is under negotiation, start/continuation is expected beginning of 2010**

<http://www.circle-era.net/>

## Context of this workshop in CIRCLE

- **This activity is part of Task III.b** A posteriori clustering of selected research projects
- “Taste” of cross-border collaboration
- Support interlinkage between projects
- Last, but not least: find topics which can be developed further if potential exists

**These workshops can be used as scoping meetings!**

# Cost – Benefit in Adapting to Climate Change

**The topic is a cross-cutting issue in adaptation research!**

**The topic is an important issue in adaptation research!**

- open announcement of workshop
- the topic is enriched by projects to be found in the CIRCLE data base

here: scoping character, different to the DSS workshop in July

# Programme and expected results

## Concept and programme along 3 questions:

- How can costs and benefits under adaptation to climate change be quantified?
- Which role and relevance do cost benefit analyses have in “real life”? Importance and acceptance
- Which best practices can be suggested for the performance of cost benefit analyses in the context of climate change adaptation?

**We expect input to these questions from this workshop  
and a „take home message“**

## participants' side:

- exchange expert knowledge
- exchange experiences

## research funders' side:

- gaps in research
- optimal funding in this part of applied science (JP, CIRCLE context, ...)
- profit from best practice

# Logistics

- Refund of travel costs: 500 € max. (transport and accommodation)

**Please send us the completed form and the original bills  
until Oct 9th at the latest!**

- Catering
- Toilets

**GO!**
